AXA Onyx chain lock

Our new jewel

AXA BIKE

AXA Onyx chain lock

The new jewel for your product line

Inspired by the strength and beauty of onyx stone, the AXA Onyx combines an expressive design with uncompromising security.

The AXA Onyx is the perfect addition to your portfolio.

It offers a very high level of security while being significantly more affordable than comparable chain locks.

Scan the QR code to watch the product video.

Hardened steel for greater resilience

The AXA Onyx is extremely robust and scores a 12/15 on our security scale. The 8.4 mm-thick chain links are made of hardened steel and offer high resistance to attacks.

Lock head with click-in function

The intuitive click-in latch on the lock head holds the chain in place during the locking process. This ensures easy handling and the everyday convenience that cyclists expect from AXA BIKE products.

New lock cylinder with anti-drilling protection

The lock cylinder is protected against the so-called “power key” and also features an anti-drilling plate for maximum protection against manipulation attempts.

Timeless design

Available in three trendy colors

The new fabric cover stands out for its comfortable feel.

It reliably protects the bike frame from scratches and, at the same time, reduces annoying noises while riding.

Certified security

Just lock it up and feel secure! Not only does the AXA Onyx look great – it also excels in terms of security. Our new chain lock has been certified by ART 2, Varefakta and Sold Secure Silver.
