CORKY X

SUNGLASSES REAR VIEW MIRROR

Corky X ensures you don't have to look over your shoulder to see approaching traffic from behind with a simple blink of an eye. So you can focus on the road ahead while staying in an optimal riding position.

[VIEW VIDEO](#)

CORKY X SUNGLASSES REAR VIEW MIRROR

Designed to allow you to look behind you without physically glancing over your shoulder as you ride your bicycle, the CORKY X has an aesthetic that looks rather familiar if you're a tech enthusiast. Modeled roughly on the form factor of the Google Glass, CORKY X gives you a different kind of HUD. Fitted with a small mirror, the eyewear accessory lets you instantly look behind you simply by glancing out of the corner of your eye.

Conceptualized in France & manufactured in South Korea.

Colors

TECHNICAL FEATURES

Lightweight - 14 grams
Zero Vibrations, great rear-view
360° Rotation
Doesn't block your view of the road ahead
Keep an eye on the other cyclists

DON'T HAVE TO LOOK BACK

CORKY X mirror ensures you don't have to look over your shoulder to see approaching traffic from behind with a simple blink of an eye. So you can focus on the road ahead while staying in an optimal riding position.

NO BLIND SPOT ON YOUR VIEW

The mirror sits at the very corner of your visual periphery, so it doesn't block your view of the road ahead and is mounted within an adjustable housing that allows you to tilt the mirror in any direction, eliminating blind spots so you have the perfect view of what's behind you.

MADE FOR PERFORMANCE

An aerodynamic form factor that allows it to cut through the air without bending or deflecting as you ride. A lightweight design that doesn't cause your glasses to tilt, and a minimal tolerance assembly that doesn't vibrate or change angles as you ride on rough terrain.

CORKY

PERFORMANCE REAR MIRROR

Preserve aerodynamics and increase your field of vision while keeping your eyes on the road. CORKY offers 360 degrees of rotation so you can view everything around you. The range of view is an incredible 100 meters.

[VIEW VIDEO](#)

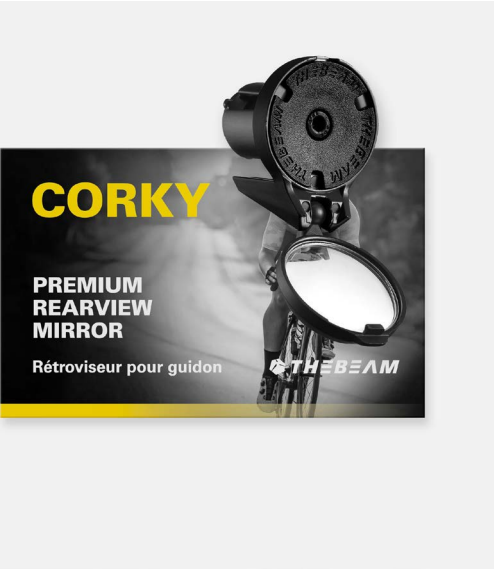

CORKY PERFORMANCE REAR MIRROR

Attaching easily to your drop bars, this system helps you stay informed while keeping your eyes on the road. As the name suggests, simply «cork up» your drop bars and open the cap to expose the mirror.

The CORKY mirror ensures you don't have to look over your shoulder to see approaching traffic from behind. Therefore, it can make completing interval sets easier because you can focus on the road ahead and the data targets on your cycling computer while staying in an optimal riding position.

Conceptualized in France & manufactured in South Korea.

Colors
