# BOPLAN® SPORT

Your partner for safe sporting events

Safety is an absolute top priority when organizing sporting events. Adequately securing locations where there is a risk of collisions - for participants, employees and the public - is a crucial aspect here.

For many years, BOPLAN® has been a worldwide leading company in the development and production of innovative polymer safety solutions for production and industrial environments, (cold) storage facilities, logistics centers, (petro) chemical sites, car parks and even airports. As a result, we have built up unprecedented expertise in securing workplaces. Driven by our mission to protect people, equipment and infrastructure from damage or injury, we also offer - under the name of BOPLAN® SPORT - solutions in impact-absorbing polymer for protecting cycling races and other sporting events.

## Are you organizing a sports event?

Our team of experts would be happy to discuss with you how we can optimize the safety at your event and minimize risks.

## BOPLAN® RACE BUMPER

The BOPLAN® RACE BUMPERS are a must for fast and efficient protection of trees, posts, fences and others dangerous obstacles along it trail. These fenders out of impact absorbent plastic give clear a potential hazard and mitigate the consequences of a possible collision with the obstacle to a minimum.

The fenders are at the back equipped with chains for fast and easy attachment. Because of the special recess optimizes the obstacle secured.

- completely impact-absorbing polymer ✓
- yellow color for optimal visibility ✓
- easy, flexible and quick to deploy ✓
- chains for quick attachment ✓
- sustainable ✓
- weather resistant ✓
- 100% recyclable ✓

BOPLAN®  
**RACE  
TOTEM**

The BOPLAN® RACE TOTEM has been specially designed to be deployed in critical places in the course where clear signage is required: at pedestrian refuge islands, speed bumps, junctions, pinch points, narrowings of carriageways, dangerous obstacles such as road signs and posts, street furniture, etc.

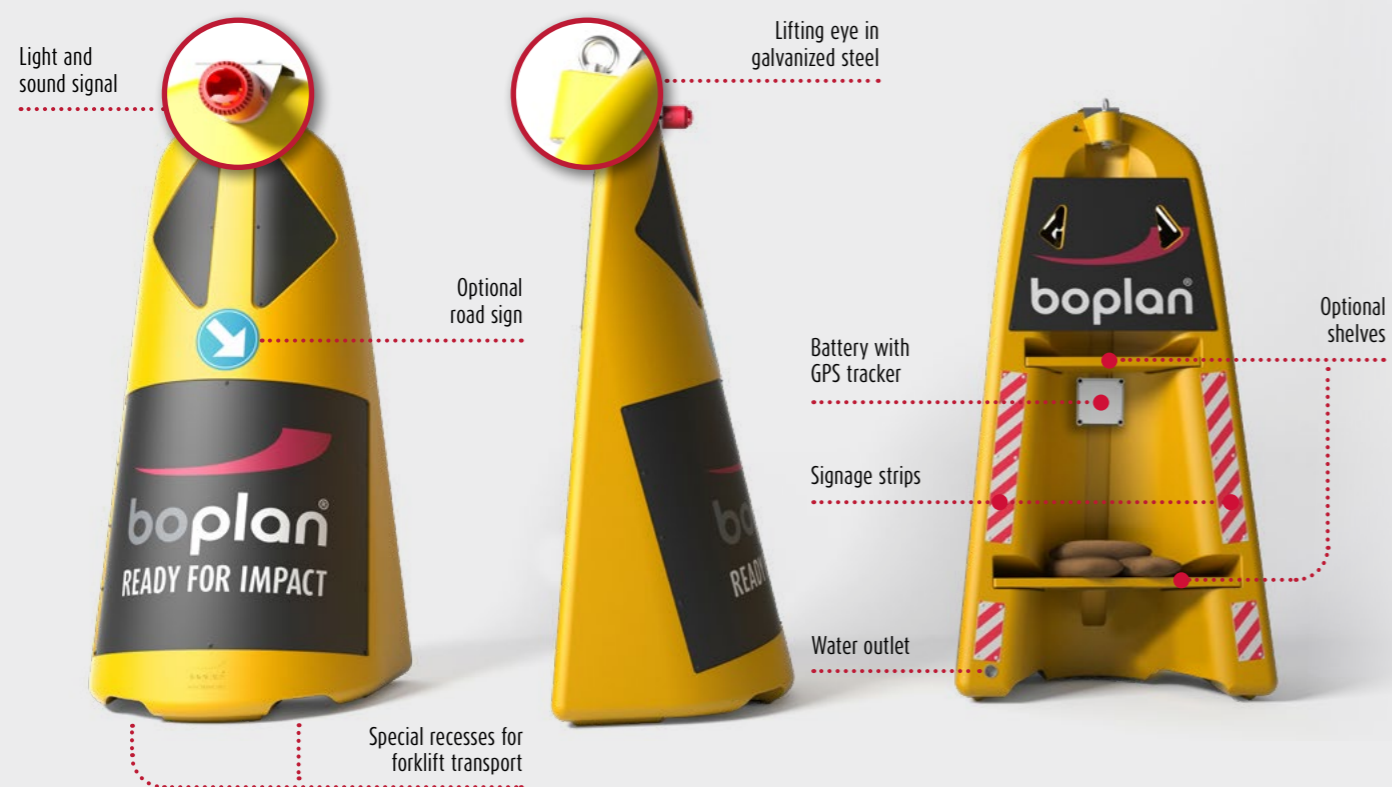

Due to its size of 2m40 and its audible warning signal, the BOPLAN® RACE TOTEM is the ideal solution to warn riders in time of a potential danger. The totem remains highly visible even in front riders in the peloton. In the event of a collision, the impact-absorbing polymer ensures much less risk of injury. In addition, the Race Totem has a design with exclusively round shapes, avoiding sharp corners. The Race Totem is also equipped with a GPS tracking system, so that you can see where it is at any time.

- ✓ optimal visibility from a great distance
- ✓ entirely made of impact-absorbing polymer
- ✓ warning by sound and light signal
- ✓ on/off via remote control
- ✓ direction indication for the riders on which side to pass
- ✓ can be equipped with a D1 traffic sign
- ✓ easy and quick to install

- special recesses for transport with forklift ✓
- lifting eye in galvanized steel ✓
- can be weighted for optimal stability ✓
- sustainable ✓
- weatherproof ✓
- round shapes, no sharp corners ✓
- battery with GPS tracking system ✓

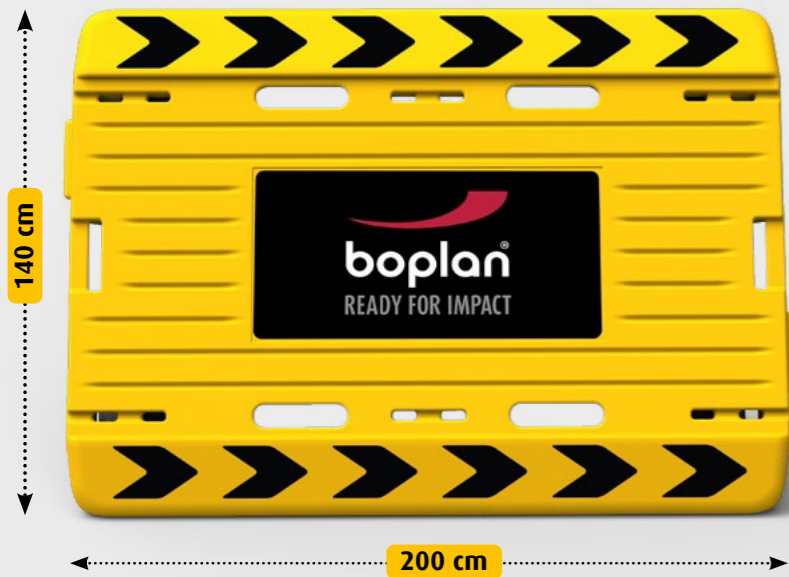

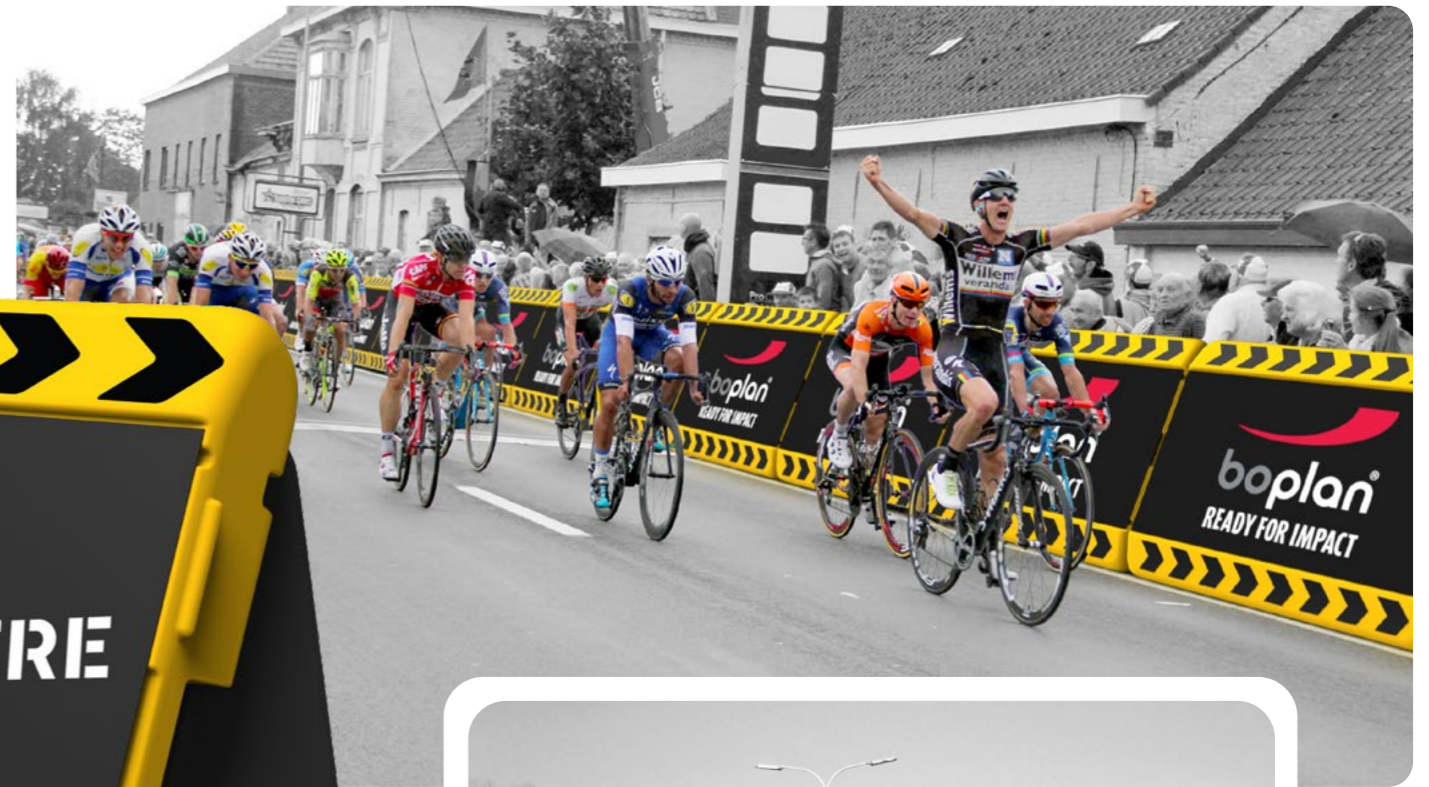

BOPLAN®  
**RACE  
BARRIER**

The finish zone is always a critical place during a cycling race. The final sprint starts in view of the finish, sometimes with a large group of riders. Because of the high speeds, the proximity of other racing cyclists and the sometimes sudden manoeuvres the risk of accidents is high.

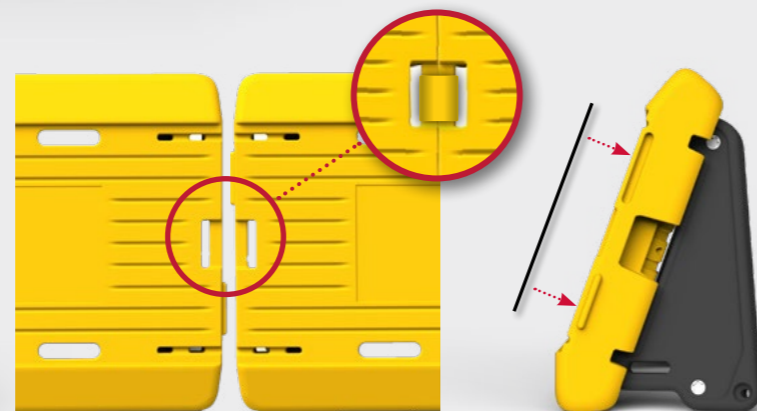

The BOPLAN® RACE BARRIERS are specially designed for the protection of the finish area of cycling races. These yellow polymer barriers are easy to use and slide together almost seamlessly with a tongue and groove connection.

The Race Barriers can be quickly coupled together and interconnected with a fixation bar. Due to their height of 140 cm and their arrangement at an angle of 70 °, they keep the public at a safe distance from the riders. The impact-absorbing polymer and smart design minimize the consequences of a possible collision. There are also special recesses for transport with a forklift and the foldable legs make them easy to stack. The BOPLAN® RACE BARRIER can be weighted if necessary.

- ✓ tongue and groove connection
- ✓ easy to connect together
- ✓ completely in impact-absorbing polymer
- ✓ 70 ° inclined arrangement
- ✓ provides "selfie-safe" distance from the audience
- ✓ recessed advertising space
- ✓ straight bottom

- ✓ recesses for forklift transport
- ✓ foldable legs
- ✓ stackable
