Let's ride towards new horizons.

PEARL iZUMi has a rich history as a cycling apparel brand. Since 1964 it has spared no expense in improving itself, in reinventing itself. In doing so, it is crucial to reflect on the journey you have already taken while keeping an eye on the destination you've set for yourself. PEARL iZUMi has recently been plotting that route under the wings of United Sports Brands, which has acquired the Japanese cycling clothing brand. A promising takeover, but what exactly does it entail?

United Sports Brands is a House of Brands, which brings together a carefully selected group of sports brands of international stature. KT Tape, McDavid, Nathan, Shock Doctor and Spalding will be joined by PEARL iZUMi and that will come with a lot of benefits for the cycling apparel brand.

Located in the beating heart of Europe, United Sports Brands Europe always has its finger on the pulse of what's happening in the many countries where it's present. In Geel, Belgium, you'll find both their warehouse, from which shipments are sent to customers all over the continent, and their brand-new headquarters, which houses specialists in design, marketing, and sales, to name a few.

The future looks bright for PEARL iZUMi and the first step of these new beginnings is this catalogue, presenting our brand-new collections for 2023. Collections we are very proud of and which will offer the first outfits of this exciting ride. Are you joining us? There's a beautiful ride waiting for us.

BREAK AWAY

(breɪk əˈweɪ)
verb

To separate oneself from a larger crowd or group

Cyclists are predestined to break away. This never-ending urge is fueled by the freedom their two-wheeled companion offers, being soaked up by the ever-changing surroundings and the freeing sensation of looking at everyday life from afar.

At PEARL iZUMi, we know how inspiring and empowering these adventures can be. How freeing it is to break free from all distractions and to enjoy the sheer focus on your legs, your bike and your direct surroundings. It's just part of our shared DNA.

That's why we want to do everything we can to support you on your bike rides, short and long, by providing you with just the right gear. Let us take care of the tiniest details of your outfits, so you can take in the stunning details the scenery has to offer.

Technology*

PEARL iZUMi proprietary

Barrier

Our Barrier fabrics provide lightweight, breathable wind protection. They are typically combined with a durable water repellent (DWR) technology to offer enough water shedding performance to protect you from brief rain showers, with better packability and breathability than a truly waterproof fabric.

Transfer

Our Transfer fabrics are made with technical fibers designed to transport perspiration away from your body to promote faster evaporation, helping you stay cool and dry. Perfect for warm to hot days, and against the skin as part of a layering system for cooler conditions.

WxB

Our WxB fabrics are designed for consistent rain. They use waterproof/breathable membranes and taped seams to create a watertight seal, yet still allow perspiration to escape so you are less likely to overheat or feel chilled from sweat.

AmFIB®

Our AmFIB softshell fabrics combine breathable protection from wind and water with lofted fibers to retain body heat, for ideal winter or cool-wet performance. These fabrics are not fully waterproof to prioritize breathability, so we can create garments that provide consistent comfort and minimize layering adjustments.

Thermal

Our Thermal fabrics provide consistent warmth during aerobic activities. They use lofted moisture-moving technical fibers to retain warm air and keep you dry. Garments made with Thermal fabrics can be worn as an outer layer for cool conditions, or as a mid-layer on the coldest days.

GoFresh™

Our GoFresh provides odor control by helping to prevent bacteria growth in fabrics during and after exercise. We use only natural anti-bacterial tech or natural fiber blends, so the fabrics are safe for your skin and the planet. After your ride, just hang the garments to dry and it will be ready to go at least one more lap. Ride. Hang. Repeat.

BioViz®

BioViz is a proprietary hi-visibility system designed to leverage human biology to make it easier for drivers to see fluorescent colors and strategically placed reflective elements to demand the viewer's attention. Our standards ensure riders are not only seen, but seen with enough time for drivers to react safely.

In-R-Cool®

Our In-R-Cool technology helps keep you cool when the mercury rises, so you can perform better and be more comfortable in hot conditions. It boosts the natural cooling properties of our technical Transfer fabrics without changing the look or feel.

PI Dry®

Our PI Dry technology provides water shedding performance at the fiber level, allowing us to create knit and woven fabrics that repel water regardless of how much they stretch. Water rolls off, keeping you warmer, dryer, and lighter. And the best part is, it lasts longer than typical DWR's delivering full performance even after 100 washes.

Technology*

Our Partners

POLARTEC®
Alpha®

Alpha active insulation is engineered for consistent warmth while allowing greater breathability during aerobic activities like cycling. It's engineered to regulate comfort in changing conditions and also feels great next-to-skin.

ECOloft

The first post-consumer recycled product that also incorporates bio-based materials for innovative, breakthrough insulation.

POLARTEC®
Neoshell®

Neoshell provides the performance of a weather protective fabric, while still allowing dynamic air exchange. Unlike traditional waterproof/breathable membranes, Neoshell is breathable before you begin to overheat, making it ideal for cycling.

PROTECTED BY
D3O®

D3O offers the thinnest and most advanced protection against impact. It's flexible to move with your body until impact, when it firms up to disperse the energy of the blow, making it perfect for riders who want to push their limits.

POLARTEC®
Delta®

Delta is a next-to-skin fabric that better utilizes the body's natural cooling process-sweat. It works more efficiently by elevating touch-points for increased airflow, faster moisture dispersal, and reduced wet-cling. It's ideal for hot weather riding.

PRIMALOFT®

PrimaLoft® Gold with cross-core technology. Thanks to ultra-light Aerogel particles, this insulation allows us to get amazing thermal performance with the least amount of material and lowest bulk.

Levitate Chamois*

CANYON 2,5L WXB RAIN JKT

The Canyon 2.5L WXB Jacket will enable you to outride the worst weather. This fully waterproof piece features all the tech you need to stay dry while chasing your friends on loam-filled singletrack. The 2.5-layer waterproof fabric is also breathable, to help regulate your temperature during high-intensity efforts. A droptail design blocks tire spray and the hood is designed to fit over a helmet, keeping you fully protected. Pair this jacket with the Canyon WBX Short for the perfect wet weather mountain bike kit.

FOOTWEAR

Shoes

1:1 NEXT-STEP

There is nothing wrong with walking your bike. Unless you can't walk your bike.

We believe a mountain bike shoe shouldn't limit any part of your ride, including what you do off the bike, so we design hike-able shoes that don't compromise pedaling performance.

GRIP

TRACTION

STABILITY

We tune our shoes to flex just ahead of the ball of the foot for a natural walking gait.

We use carbon rubber for confidence inspiring traction.

Strategically placed EVA foam provides off-bike cushioning, without effecting pedaling performance.

15182302

PRO ROAD

- Perforated synthetic leather upper is durable and breathable
- BOA® Fit System with dual L6C dials for zonal adjustment Soft TX lace guides eliminate pressure and hotspots
- 1:1® PRO Carbon Power Plate drops weight and adds ventilation, without sacrificing stiffness
- Dual density 1:1 footbed is ergonomically designed to provide optimal support, pedaling efficiency and comfort
- 252 grams per shoe (size 42)

Black - 021

White - 508

TRANSFER MESH SL BASE

- Pedal to Zero™: Going by bike 9mi / 15km offsets the climate impact of this garment
- PRO Transfer Mesh fabric is highly breathable and quick drying
- Sweat-activated In-R-Cool® technology improves thermal regulation
- GoFresh™ anti-odor technology, bluesign® approved
- Designed for all day performance from chilly starts to hot finishes
- Form fit

White - 508

Size: **S-XXL**

11122307

TRANSFER WOOL LS BASE

- Lightweight DriRelease® Merino blend for moisture and odor management
- Softer than cotton feel is great next to skin
- High stretch for a close-to-body fit
- Longer length for coverage when tucked into tights
- Thumb loops help slide arms through form fit outerwear
- Form Fit

Phantom - 6LR

Size: **S-XL**

PRESENTING THE:

LEVITATE

CHAMOIS

PEARL iZUMi has been at the storefront of developing high-performance cycling apparel for more than 60 years. Back in 1983, we introduced the first synthetic chamois. Then in 2002, we unveiled the first multi-density 3D chamois design that will help you ride further in unrivaled comfort.

PEARL iZUMi is one of only a handful of cycling apparel companies that designs its own chamois, rather than selecting them from a manufacturer's catalog. The ability to design and prototype in-house gave us the freedom to reimagine how a chamois should function. And it was our imagination, accessed during the trance-like mind state on a ride, that led to this latest innovation.

Smooth Linear Support

Most high-performance chamois use multiple densities of foam to provide the best balance of support and comfort, but none of them provide linear suspension. Until now. Our new Next Gen Suspension Core smoothly progresses from supporting stable pedalling loads to 4x as much force. Test riders noted that this new chamois design gave them a feeling of being suspended over the saddle, of floating over bumps, potholes and road chatter, and so the Levitate name was born.

All Day Comfort

Nobody wants to feel their sitbones after hours in the saddle. And you won't with the Levitate. The same elements that create a more linear feel also result in lower peak pressures under the rider. That's because suspending the rider is made possible by distributing pressures over a wider area. Which means you'll feel better during the ride, after, and the next day when you get back on the bike.

PRO Escape

LEVITATE | PRO

ELEVATE YOUR RIDE

LEVITATE

- Quality ride experience
- Support matching most multi-density designs on the market
- Same Infinite Edge and Dynamic Relief Channel design as the PRO
- Hours of support for your ride

LEVITATE PLUS

- Industry leading ride experience
- 70%-90% more support than most multi-density designs on the market
- Same Boundary Layer & Suspension Core design as PRO, with Infinite Edge & Dynamic Relief Channel
- Hours of support for your ride

LEVITATE PRO

- The new benchmark in ride experience
- 80%-100% more support than most multi-density designs on the market
- Maximum ventilation for unparalleled comfort
- Exceptional multi-directional stretch provides our most luxurious fit

DYNAMIC RELIEF CHANNEL

PRESENTING THE:

LEVITATE

CHAMOIS

For years riders have benefited from center line pressure reducing saddles. Our new Levitate chamois takes this to the next level with the Dynamic Relief Channel, which maintains its pressure relieving shape no matter how the chamois bends and flexes under the rider. You'll feel support where you want it and nothing where you don't.

INFINITE EDGE

PRESENTING THE:

LEVITATE CHAMOIS

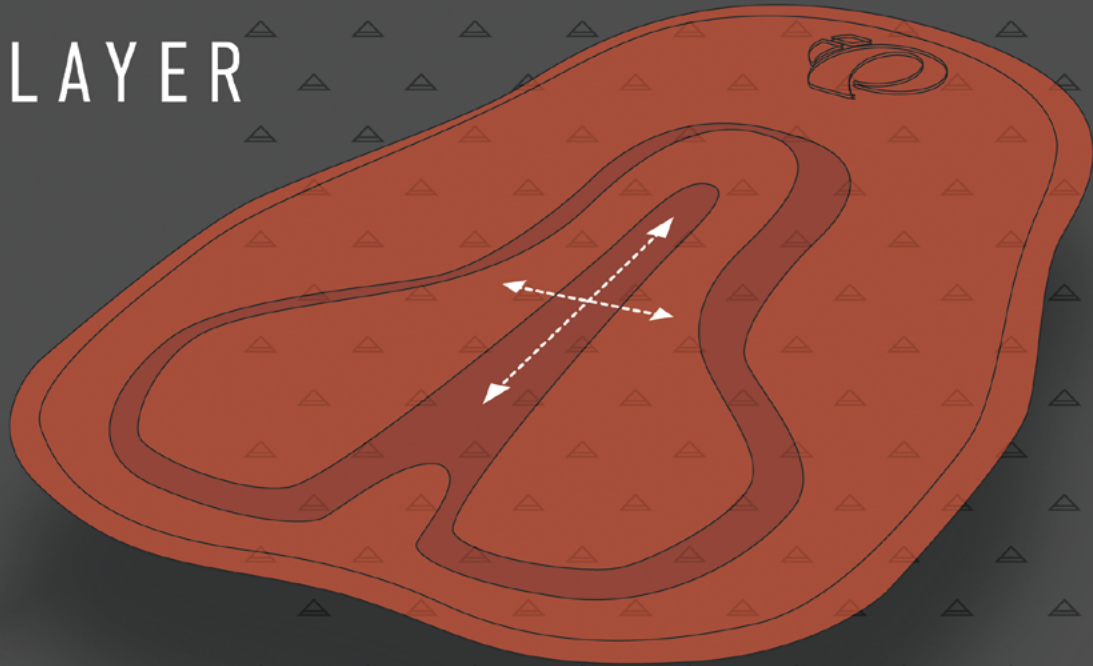

The best chamois disappear while you're riding. That means our goal is to make sure you don't feel anything, including transitions from firm to soft or thick to thin. Instead of using heat to mold edges, we carefully cut away excess material to reduce bulk and create a smooth taper that blends seamlessly. All you'll feel is supportive comfort.

1:1[®] BOUNDARY LAYER

Chamois solve two problems: damping road imperfections and reducing pedaling friction. Our 1:1 Boundary Layer is the enemy of friction. It moves with you dynamically and quickly wicks moisture off your skin to keep you dry. And to help it perfectly match your body, the Suspension Core is attached just at the front and rear, so that the two layers can move independently. It'll take such good care of your skin that you might even be able to skip the awkward chamois cream ritual.

To make sure this critical layer is between you and your bike we've updated the shape. Our test riders asked for a wider front to accommodate those situations where you're not sitting perfectly on the saddle. And the sitting area is extended forward to effectively increase the width without making the chamois wider. You'll feel like the chamois is always in the right spot.

LEVITATE

BASE LEVITATE

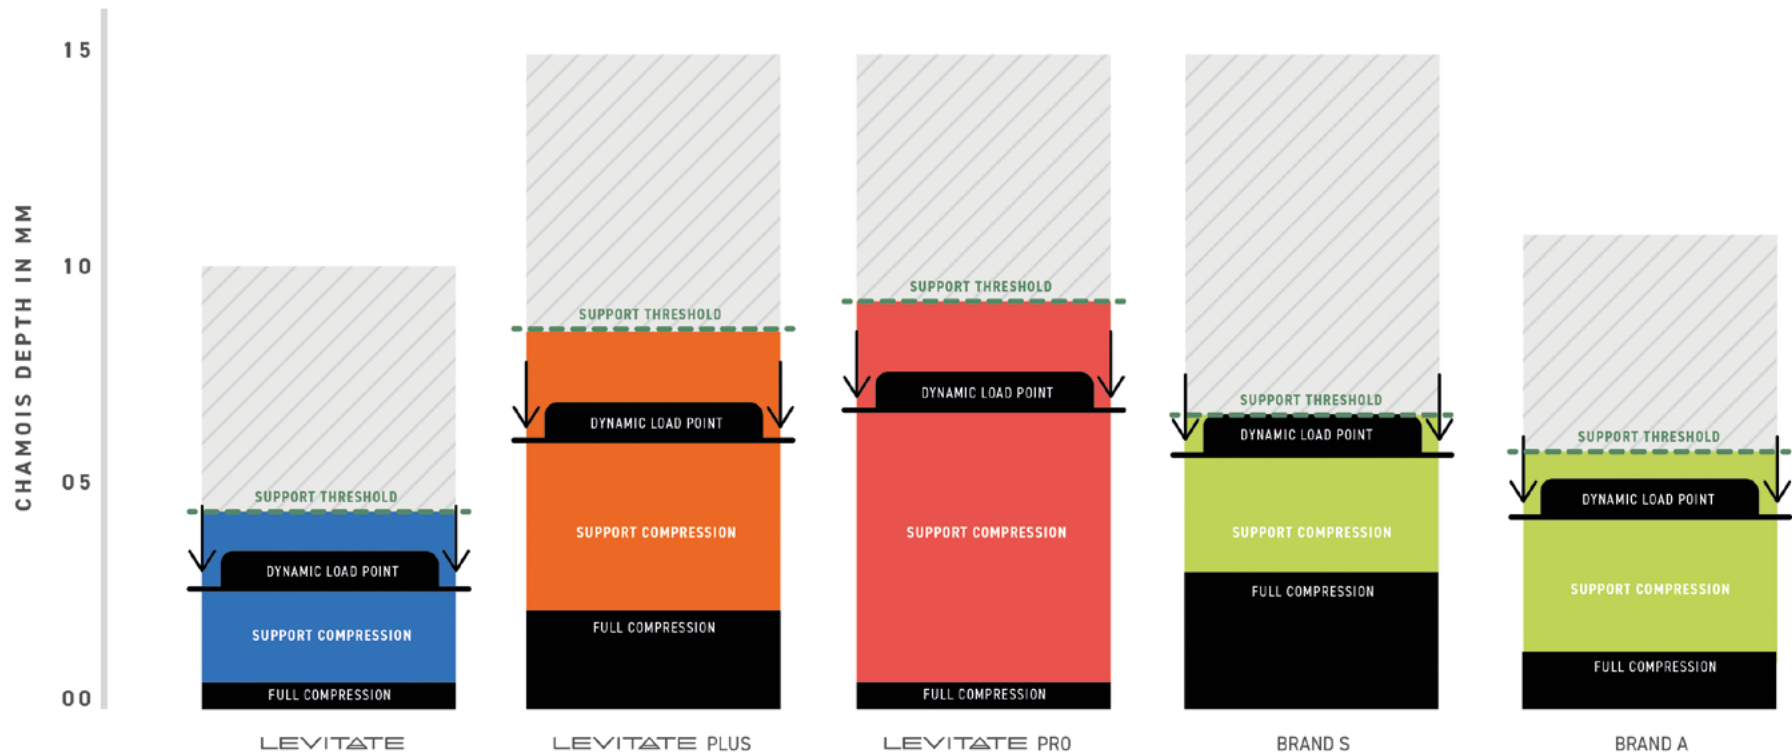

PRESENTING THE:

LEVITATE
CHAMOIS

Innovation isn't reserved for just the highest end products, our new base Levitate chamois delivers a premium ride experience too. We've increased comfort with medium support that performs as well as most multi-density designs on the market. And it benefits from the same Infinite Edge and Dynamic Relief Channel designs as the PRO. Hours into a ride you still experience the support.

USABLE COMPRESSION

PRESENTING THE:

LEVITATE
CHAMOIS

CHAMOIS RIDE QUALITY IS ALL ABOUT USABLE COMPRESSION.

- The support threshold is where the chamois starts to support your body weight.
- The dynamic load point is how far you settle into the chamois while pedaling.
- A larger support compression zone below the dynamic load point offers a smoother ride.
- When a chamois reaches full compression, it is effectively bottomed out.

MEN'S SIZE GUIDE

STEP 1: MEASURE YOURSELF

1 CHEST

Measure around the fullest part, across bust points, keeping the tape horizontal.

2 WAIST

Measure around the narrowest part (typically the small of your back and where your body bends side to side), keeping the tape horizontal.

3 HIPS

Measure around the fullest part of your hips, keeping the tape horizontal.

4 INSEAM

Inseam refers to the length of the garment, from the crotch seam to the hem.

STEP 2: FIND YOUR SIZE

Use the size chart to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit.

If your measurements for bust and waist correspond to two different suggested sizes, order the size indicated by your bust measurement. If your body measurements for hips and waist correspond to two different suggested sizes, order the one indicated by your hip measurement.

**These are sizing guidelines.
Please take your body measurements to determine your most accurate size.
