

OLMO

collezione 2024

IT. Giuseppe Olmo, detto Gepin è stato uno dei protagonisti assoluti del ciclismo italiano su strada sia al Giro che nelle Classiche dell'epoca. Il 31 ottobre 1935 entra nella leggenda demolendo il record dell'ora su pista del francese Richard e stabilendo il primato di 45.090 km percorsi. Nel 1939 Giuseppe fonda la Olmo Biciclette: in pochi anni dalla fabbrica di Celle Ligure escono le biciclette da competizione più performanti e tecnicamente avanzate del periodo, testate direttamente da Gepin e pronte per essere portate in trionfo dai ciclisti professionisti.

EN. Giuseppe Olmo, known as Gepin, was one of the top road racers in Italian cycling, both in the Giro d'Italia and in the Classics races of the time.

On October 31, 1935, Gepin became a legend by demolishing the hour track record held by the French cyclist Richard and establishing the new record of 45.090 km. In 1939 Giuseppe founded Olmo Biciclette: in just a few years the Celle Ligure factory produced the highest performing and technically most advanced racing bicycles of the time, tested directly by Gepin and ready to be ridden in triumph by professional cyclists.

FR. Giuseppe Olmo, dit Gepin, est l'un des protagonistes absolus du cyclisme italien sur route, que ce soit au Tour d'Italie ou dans les Classiques de l'époque.

Le 31 octobre 1935, il entre dans la légende, anéantissant le record de l'heure sur piste du Français Richard et établissant le record de 45.090 km parcourus. En 1939, Giuseppe fonde l'entreprise Olmo Biciclette: en quelques années, l'usine de Celle Ligure produit les vélos de compétition les plus performants et techniquement avancés de l'époque, directement testés par Gepin et prêts pour être portés en triomphe par les cyclistes professionnels.

ES. Giuseppe Olmo, apodado Gepin, fue uno de los protagonistas absolutos del ciclismo italiano de carretera, tanto en el Giro como en las clásicas de la época.

El 31 de octubre de 1935 pasa a formar parte de la leyenda, pulverizando el récord de la hora en pista del francés Richard y estableciendo el récord de 45.090 Km recorridos.

En 1939 Giuseppe funda Olmo Biciclette: en pocos años, de la fábrica de Celle Ligure salen las bicicletas de competición con más prestaciones y técnicamente más avanzadas de la época, comprobadas directamente por Gepin y listas para triunfar al lado de ciclistas profesionales.

RACING ATTITUDE

IT. Il legame tra Olmo e le competizioni affonda le radici nelle imprese sportive di Giuseppe Olmo, detto Gepìn, protagonista tra il 1932 e il 1938 di prestazioni che hanno reso grande il ciclismo italiano.

Dal 1939, anno della fondazione della Olmo biciclette, i modelli di punta hanno equipaggiato decine di team e professionisti di tutto il mondo.

FR. Le lien entre Olmo et les compétitions remonte aux entreprises sportives de Giuseppe Olmo, dit Gepìn, protagoniste, entre 1932 et 1938, de prestations qui ont contribué à faire du cyclisme italien le grand sport qu'il est aujourd'hui. À partir de 1939, année de la fondation de l'entreprise Olmo Biciclette, les modèles de pointe ont équipé des dizaines de teams et de professionnels du monde entier.

EN. The connection between Olmo and racing has its roots in the sporting achievements of Giuseppe Olmo, better known as Gepìn, the racer whose performances from 1932 to 1938 helped make Italian cycling great. Since 1939, when Olmo bicycles was founded, our top models have equipped dozens of teams and have been ridden by professionals from all over the world.

ES. La relación entre Olmo y el mundo de la competición tiene sus raíces en las gestas deportivas de Giuseppe Olmo, apodado Gepìn, que entre 1932 y 1938 protagonizó unas prestaciones que contribuyeron a la grandeza del ciclismo italiano.

A partir de 1939, año en que se fundó Olmo Biciclette, sus modelos punteros han equipado a decenas de equipos y profesionales del mundo entero.

NERAX

IT. La punta di diamante della produzione Olmo è la NERAX, sinonimo di leggerezza e integrazione. Tutto ciò che i ciclisti più perfezionisti cercano nelle biciclette più evolute: leggerezza, controllo in velocità, rendimento in frenata, stabilità, trasmissione elettronica, aerodinamicità e integrazione totale dei cavi. La particolarità della Olmo Nerax è il tipo di carbonio utilizzato nella sua costruzione: T24 al 45% - T30 al 45% e T36 al 10%. Grazie a questo il telaio raggiunge lo straordinario peso di 750 gr (+/- 5-6% grezzo) nella misura piccola fino agli 850 gr (+/- 5-6% grezzo) nella misura più grande diventando così più leggero ma allo stesso tempo più rigido e performante.

FR. Le haut de gamme de la production Olmo est le NERAX, synonyme de légèreté et d'intégration. Tout ce que les cyclistes les plus perfectionnistes recherchent dans les vélos les plus performants : légèreté, contrôle, performance du freinage, stabilité, transmission électrique, aérodynamisme et intégration totale des câbles. La particularité d'Olmo Nerax est le type de carbone utilisé dans sa construction : T24 à 45% - T30 à 45% et T36 à 10%. Grâce à cela, le cadre atteint le poids extraordinaire de 750 gr (+/- 5-6% brut) dans la plus petite taille jusqu'à 850 gr (+/- 5-6% brut) dans la plus grande devenant ainsi plus léger mais en même temps plus rigide et performant.

EN. NERAX is the absolute gem of OLMO production, a perfect combination of lightness and integration.

Nerax has everything a perfectionist cyclist is looking for: lightness, high-speed road holding, highly efficient braking, stability, electronic drive unit, aerodynamics and wholly-integrated cables.

The peculiarity of Olmo Nerax is the type of carbon employed for its production: 45% of T24 – 45% of T30 and 10% of T36. The result is a more rigid and performing frame with an extraordinary weight of 750 gr (+/- 5-6% raw) in its small size and 850 gr (+/- 5-6% raw) in its larger size.

ES. La punta de lanza de la producción de Olmo es la NERAX, sinónimo de ligereza e integración. Todo lo que los ciclistas más perfeccionistas buscan en las bicicletas más avanzadas: ligereza, control de velocidad, rendimiento de frenada, estabilidad, transmisión electrónica, aerodinámica e integración total de los cables.

La peculiaridad de Olmo Nerax es el tipo de carbono utilizado en su construcción: T24 al 45% - T30 al 45% y T36 al 10%. Gracias a esto el cuadro alcanza el extraordinario peso de 750 gr (+/- 5-6% crudo) en la medida pequeña hasta 850 gr (+/- 5-6% crudo) en la medida más grande volviéndose así más ligero pero al mismo tiempo más rígido y eficaz.

APP

SHIMANO
E-TUBE PROJECT CYCLIST

Three screenshots of the SHIMANO e-tube app interface. The left screenshot shows the main menu with a list of components: Battery BT-E8016 SHIMANO, UPDATE AVAILABLE DU-EP800 ver 4.0.2 → ver 4.1.8, SC-EM800 ver 4.1.0 - Latest Bluetooth® LE ver 4.7.1.0, and SW-EM800-L ver 3.0.1 - Latest. The middle screenshot shows a 'Switch' screen for 'Bike-1' with diagrams for Left and Right shifters. The right screenshot shows a detailed 'Front derailleur' adjustment screen with a slider for 'Adjustment: +2' and a note to 'Adjust the gap between the chain and the front derailleur to 0 to 0.5mm.'

IT. Dall'unione delle tecnologie utilizzate dal gruppo MDE and Montana/Olmo, abbiamo creato la nuovissima OLMO E.KOLT dotata di un evoluto sistema di sospensione virtual pivot.

FR. Grâce à la combinaison des technologies utilisées par le groupe Montana / Olmo et MDE, nous avons créé le tout nouveau OLMO E.Kolt équipé d'un système de suspension avancé à pivot virtuel.

EN. Montana/Olmo group and MDE joined forces to create a groundbreaking e-bike with an advanced virtual pivot suspension system: OLMO E.Kolt.

ES. Gracias a la combinación de las tecnologías utilizadas por el grupo Montana/Olmo y MDE, hemos creado el nuevo E.KOLT equipado con un avanzado sistema de suspensión de pivot virtual.

E.KOLT

IT. Il sistema di sospensione ha il perno principale della biella bassa integrato, sviluppa un concetto innovativo per una migliore integrazione con l'unità di trasmissione unificando il perno principale del braccio inferiore con uno dei supporti del motore. Infatti l'unità motore diventa una parte strutturale delle sospensioni posteriori permettendoci di ottenere maggiore spazio per il forcellone posteriore, risparmiare peso e ottenere un notevole aumento di rigidità. Questo ha anche permesso di assicurare un migliore posizionamento del centro istantaneo di rotazione per calibrare il comportamento della sospensione anche in considerazione della spinta aggiuntiva data dall'unità motrice. Grazie al punto di partenza della curva Anti-Squat risulterà un eccellente comportamento di pedalata. Gli altri fulcri della sospensione hanno perni da 15mm e utilizzano cuscinetti Enduro Bearings.

Il sistema ha una curva di compressione progressiva con un intervallo compreso tra 2,9 e 2,3, in questo modo potrà essere utilizzato sia con ammortizzatori ad aria che a molla. La curva anti-rise rimane al di sotto del 100% dalla posizione di Sag alla fine della corsa, per un effetto neutro sulle forze frenanti. L'ammortizzatore è posto subito sotto e parallelamente al tubo orizzontale a vantaggio della compattezza del telaio, della quota di standover e dello spazio a disposizione all'interno del triangolo principale per poter alloggiare una borraccia. Cavi e guaine sono all'interno del telaio e grazie alla serie sterzo la E-Kolt gode di un aspetto molto pulito e ordinato dal manubrio.

L'assistenza alla pedalata sulla E.Kolt è fornita dal motore Polini Ep3+ MX con 90Nm e la batteria da 711Wh/19,6 Ah (celle SAMSUNG 21700) per coprire distanze senza ansia da ricarica. Un motore contraddistinto dal segno + (PLUS) che indica tutte le novità rispetto al precedente, l'attento studio e impegno nella progettazione, sempre alla ricerca di migliori performance. Leggero, potente e compatto, il motore Polini ha un ingombro laterale tra i più ridotti della categoria. La batteria agli ioni di litio è integrata al telaio, dando un accattivante effetto estetico. Il tubo obliquo, studiato per ridurre l'impatto ottico, è realizzato in alluminio trafilato e perfettamente integrato al motore con un punto di sicurezza per il fissaggio della batteria.

EN. For an overall better integration of the frame with the drive unit, the suspension system develops a main pivot of the lower link integrated with one of the engine supports.

The motor unit becomes a structural part of the rear suspensions, allowing not only to have more space for the rear swingarm, but also to have a lighter and considerably stiffer frame. This allows a better positioning of the instant rotation center (I.C.), calibrating the behavior of the suspension also taking in account the additional thrust of the motor.

The anti-squat curve starting point guarantees an excellent pedaling behavior. The other pivotal suspension points are equipped with 15mm axles and Enduro Bearings.

The system has a progressive compression curve with a range from 2.9 to 2.3, allowing a perfect assembly of both air or coil spring shocks. The anti-rise curve remains under 100% from Sag position to full travel, for a neutral effect on brake forces. The rear shock is assembled in parallel right under the top tube supporting both frame compactness and standover quote, creating also space for bottle cage assembling. Cables and wires getting inside the head set and passing through the frame give E-Kolt a rather tidy and smart look.

E.Kolt pedal assistance is powered by Polini Ep3+MX system, with a 90Nm motor and a 711Wh/19,6 Ah (SAMSUNG cells 21700) battery to cover anxiety-free long distances. A last-generation motor with the "+" sign (PLUS) to show all the innovations compared to the precedent one, and to underline the never-ending analysis, study and commitment in designing it, always looking for better performances. Light, powerful and compact, Polini motor has one of the most reduced lateral volume in its category.

The lithium-ion battery is integrated into the frame, giving the bike a captivating look. The drawn alloy down tube is specifically designed to reduce the visual impact; it is perfectly integrated with the motor case, featuring also a security system for the battery fixing.

FR. Le système de suspension posséde un pivot principal intégré de la bielle inférieure. Il utilise un concept innovant pour une meilleure intégration avec l'unité de transmission.

Le pivot principal du bras inférieur est associé à l'un des supports moteur. En fait, le bloc moteur devient une partie structurelle de la suspension arrière, ce qui nous permet d'obtenir plus d'espace pour le bras oscillant arrière, de gagner du poids et d'obtenir une augmentation significative de la rigidité. Ceci a également permis d'assurer un meilleur positionnement du centre instantané de rotation pour calibrer le comportement de la suspension en tenant compte de la poussée supplémentaire donnée par l'unité d' entraînement.

Grâce au point de départ de la courbe « Anti-Squat », il en résultera un excellent comportement de pédalage. Les autres axes de suspension ont des axes de 15 mm et utilisent des roulements Enduro.

Le système a une courbe de compression progressive avec une plage comprise entre 2,9 et 2,3, il peut donc être utilisé avec des amortisseurs à air et à ressort.

La courbe anti-montée reste inférieure à 100% de la position SAG jusqu'à la fin de la course, pour un effet neutre sur les forces de freinage.

L'amortisseur est placé immédiatement en dessous et parallèlement au tube horizontal ce qui favorise la compacité du châssis, de l'enjambement et de l'espace disponible au sein du triangle principal pour accueillir un bidon.

Les câbles et les gaines sont intégrée au cadre. Grâce sa douille de direction, l'E-Kolt a un aspect très pur et bien ordonné depuis le poste de pilotage.

L'assistance au pédalage sur l'E.Kolt est assurée par le moteur Polini Ep3+MX de 90Nm et la batterie 711Wh/19,6 Ah (cellules SAMSUNG 21700), ce qui garantit une longue distance sans inquiétude pour la recharge. Un moteur caractérisé par le signe + (PLUS) qui indique toutes les innovations par rapport au précédent, l'étude minutieuse et l'engagement envers la conception, toujours à la recherche de meilleures performances. Léger, puissant et compact, le moteur Polini possède l'un des plus petits encombrements latéraux de sa catégorie.

La batterie lithium-ion est intégrée dans le cadre, donnant un effet esthétique attractif. Le tube diagonal, conçu pour réduire l'impact visuel, est en aluminium étiré et parfaitement intégré au moteur avec un système de sécurité pour la fixation de la batterie.

ES. El sistema de suspensión tiene integrado el pivote principal de la biela inferior, desarrolla un concepto innovador para una mejor integración con la unidad de transmisión al unificar el pivote principal del brazo inferior con uno de los soportes del motor.

De hecho, el grupo motor se convierte en una parte estructural de la suspensión trasera permitiéndonos obtener más espacio para el basculante trasero, ahorrar peso y obtener un aumento significativo de la rigidez. Esto también permitió asegurar un mejor posicionamiento del centro de rotación instantáneo para calibrar el comportamiento de la suspensión también en consideración del empuje adicional proporcionado por la unidad de transmisión.

Gracias al punto de inicio de la curva Anti-Squat se obtendrá un excelente comportamiento de pedaleo. Los otros bujes de suspensión tienen ejes de 15 mm y usan rodamientos Enduro Bearings.

El sistema tiene una curva de compresión progresiva con un rango entre 2.9 y 2.3, por lo que puede usarse tanto con amortiguadores de aire como de muelle. La curva anti-elevación se mantiene por debajo del 100 % desde la posición Sag hasta el final de la carrera, para un efecto neutral en las fuerzas de frenado.

El amortiguador se coloca inmediatamente debajo y paralelo al tubo horizontal en beneficio de la compactidad del marco, la altura del entrepiés y el espacio disponible dentro del triángulo principal para acomodar una botella.

Los cables y las carcchas están dentro del cuadro y, gracias a la dirección, el E.KOLT tiene un aspecto muy limpio y ordenado desde el manillar.

La asistencia al pedaleo en el E.KOLT la proporciona el motor Polini Ep3 + MX con 90Nm y la batería de 711Wh/19,6 Ah (células SAMSUNG 21700), un valor que garantiza una larga distancia sin recargar la aniedad. Un motor caracterizado por el signo + (PLUS) que indica todas las novedades respecto al anterior, el estudio cuidadoso y la apuesta por el diseño, buscando siempre las mejores prestaciones. Ligero, potente y compacto, el motor Polini tiene una de las dimensiones laterales más pequeñas de su categoría. La batería de iones de litio está integrada en el marco, dando un atractivo efecto estético. El tubo inferior, diseñado para reducir el impacto óptico, está fabricado en aluminio trefilado y perfectamente integrado con el motor con un punto de seguridad para la fijación de la batería.

GARANZIA

GARANZIA

Montana S.r.l. garantisce il telaio per il periodo di due anni (12 mesi per la verniciatura e cromatura) mentre per tutte le componenti vale la garanzia della casa produttrice. La garanzia ha inizio dalla data di acquisto, purché tale acquisto sia avvenuto presso un rivenditore autorizzato. In caso di difetti di fabbricazione o imputabili ai materiali impiegati e purché il telaio sia sottoposto alle normali condizioni d'uso, Montana S.r.l. si impegna a riparare o sostituire le parti in garanzia risultate difettose, mentre saranno a carico del cliente le spese di trasporto. Ferme restando le caratteristiche essenziali, ci riserviamo il diritto di eventuali variazioni tecniche o di accessori per qualunque modello illustrato in catalogo. I colori delle biciclette presenti su questo catalogo possono avere variazioni essendo stampati su materiali diversi. Le immagini contenute nel catalogo sono puramente indicative: Montana S.r.l. si riserva il diritto di apportare eventuali modifiche atte a migliorare la qualità dei prodotti illustrati senza alcun preavviso. Per quanto riguarda le e-bikes, la garanzia su motori e batterie è di 2 anni, tranne nel caso di noleggi dove viene ridotta a 1 anno sul motore e 1 anno sulla batteria con capacità minima del 70% e 500 cicli.

WARRANTY

Montana S.r.l. guarantees the frame for a period of two years (12 months for paint and chrome plating); for all components, the manufacturer's warranty shall apply. The warranty begins from the date of purchase, provided that the purchase took place at an authorized dealer. In case of manufacturing defects or defects attributable to the materials used and provided that the frame is subjected to normal usage conditions, Montana S.r.l. shall repair or replace the parts under warranty found to be defective. Shipping costs will be charged to the customer. Without prejudice to the essential specifications, we reserve the right to make any technical changes or changes in accessories for any model shown in the catalog. The colors of the bicycles in this catalog may present variations due to their being printed on different materials. The images contained in the catalog are purely for illustration purposes: Montana S.r.l. reserves the right to make any changes to improve the quality of the products illustrated without prior notice. Concerning e-bikes, the warranty for both motor and battery is 2 years; if the bike is a rental model, the warranty is 1 year on the motor and 1 year on the battery with a minimum capacity of 70% or 500 recharge cycles.

GARANTIE

Montana S.r.l. garantit le cadre pour une période de deux ans (12 mois pour la peinture et le chromage), tandis que tous les composants relèvent de la garantie du fabricant. La garantie prend effet à compter de la date d'achat, à condition que l'article ait été acheté chez un revendeur autorisé. En cas de défauts de fabrication ou imputables aux matériaux employés, et à condition que le cadre soit soumis à des conditions normales d'utilisation, Montana S.r.l. s'engage à réparer ou remplacer les parties en garantie qui s'avèreraient défectueuses, tandis que les frais de transport seront à la charge du client. Sans préjudice des caractéristiques essentielles, nous nous réservons le droit d'appliquer des variations techniques ou d'accessoires éventuelles pour tout modèle illustré dans le catalogue. Les couleurs des vélos présents sur ce catalogue peuvent subir des variations, étant donné qu'ils sont appliqués sur des matériaux divers. Les images contenues dans le catalogue sont purement indicatives: Montana S.r.l. se réserve le droit d'apporter, sans aucun préavis, d'éventuelles modifications propres à améliorer la qualité des produits illustrés. Pour les E-Bikes la garantie sur moteur et batterie est de 2 ans, réduite à 1 an en cas de vélos utilisés en location (dans ce cas pour la batterie capacité minimale de 70% et 500 cycles).

GARANTÍA

Montana S.r.l. garantiza el chasis durante un período de dos años (12 meses para la pintura y el cromado), mientras que para todos los componentes es válida la garantía del fabricante. La garantía entra en vigor en el momento de la compra, siempre que dicha compra se haya efectuado en un establecimiento autorizado. En caso de defectos de fabricación o imputables a los materiales empleados, y siempre que el chasis sea sometido a las condiciones de uso normales, Montana S.r.l. se compromete a reparar o cambiar las piezas en garantía que resulten defectuosas, mientras que los gastos de transporte correrán a cargo del cliente. Sin perjuicio de las características esenciales, nos reservamos el derecho a posibles variaciones técnicas o de accesorios para cualquier modelo ilustrado en el catálogo. Los colores de las bicicletas incluidas en este catálogo pueden sufrir variaciones, al estar impresos en materiales diferentes. Las imágenes contenidas en el catálogo son meramente indicativas. Montana S.r.l. se reserva el derecho de aportar posibles cambios destinados a mejorar la calidad de los productos ilustrados sin previo aviso. En cuanto a las bicicletas eléctricas, la garantía de los motores y las baterías son de 2 años, excepto en el caso de alquileres donde se reduce a 1 año en el motor y 1 año en la batería con una capacidad mínima de 70% y 500 ciclos.
