6XO*

**SIZE: 36-43**

**Easy on/off in busy studio environment**

- Women's specific fit
- Booty construction with single strap
- Mesh forefoot for additional breathability and comfort
- 3/4 length composite shank provides pedaling stiffness without sacrificing walk-ability
- Easy to walk recessed-cleat design
- 2-bolt SPD cleat compatible

PEARL IZUMI

# Technology

## Levitate Chamois

## LEVITATE PRO CHAMOIS

The pinnacle of comfort and performance offering the highest level of support, stretch, & breathability on the market.

# LEVITATE PLUS CHAMOIS

Daily driver ready to go the distance with dual high-density layers that distribute body weight over a large area offering optimal comfort.

# LEVITATE CHAMOIS

Single layer medium density material, with thicker cross-section provides comfortable support to high-pressure areas.

# Technology

## Proprietary Technology

### **Barrier**

Our Barrier fabrics provide lightweight, breathable wind protection. They are typically combined with a durable water repellent (DWR) technology to offer enough water shedding performance to protect you from brief rain showers, with better packability and breathability than a truly waterproof fabric.

### **GoFresh™**

Our GoFresh provides odor control by helping to prevent bacteria growth in fabrics during and after exercise. We use only natural anti-bacterial tech or natural fiber blends, so the fabrics are safe for your skin and the planet. After your ride, just hang the garments to dry and it will be ready to go at least one more lap. Ride. Hang. Repeat.

### **Transfer**

Our Transfer fabrics are made with technical fibers designed to transport perspiration away from your body to promote faster evaporation, helping you stay cool and dry. Perfect for warm to hot days, and against the skin as part of a layering system for cooler conditions.

### **BioViz®**

BioViz is a proprietary hi-visibility system designed to leverage human biology to make it easier for drivers to see fluorescent colors and strategically placed reflective elements to demand the viewer's attention. Our standards ensure riders are not only seen, but seen with enough time for drivers to react safely.

### **WxB**

Our WxB fabrics are designed for consistent rain. They use waterproof/breathable membranes and taped seams to create a watertight seal, yet still allow perspiration to escape so you are less likely to overheat or feel chilled from sweat.

### **In-R-Cool®**

Our In-R-Cool technology helps keep you cool when the mercury rises, so you can perform better and be more comfortable in hot conditions. It boosts the natural cooling properties of our technical Transfer fabrics without changing the look or feel.

### **AmFIB®**

Our AmFIB softshell fabrics combine breathable protection from wind and water with lofted fibers to retain body heat, for ideal winter or cool-wet performance. These fabrics are not fully waterproof to prioritize breathability, so we can create garments that provide consistent comfort and minimize layering adjustments.

### **PI Dry®**

Our PI Dry technology provides water shedding performance at the fiber level, allowing us to create knit and woven fabrics that repel water regardless of how much they stretch. Water rolls off, keeping you warmer, dryer, and lighter. And the best part is, it lasts longer than typical DWR's delivering full performance even after 100 washes.

### **Thermal**

Our Thermal fabrics provide consistent warmth during aerobic activities. They use lofted moisture-moving technical fibers to retain warm air and keep you dry. Garments made with Thermal fabrics can be worn as an outer layer for cool conditions, or as a mid-layer on the coldest days.

# Technology

## Our Partners

**POLARTEC®**  
**Alpha®**

Alpha active insulation is engineered for consistent warmth while allowing greater breathability during aerobic activities like cycling. It's engineered to regulate comfort in changing conditions and also feels great next-to-skin.

**POLARTEC®**  
**Neoshell**

Neoshell provides the performance of a weather protective fabric, while still allowing dynamic air exchange. Unlike traditional waterproof/breathable membranes, Neoshell is breathable before you begin to overheat, making it ideal for cycling.

**POLARTEC®**  
**Delta®**

Delta is a next-to-skin fabric that better utilizes the body's natural cooling process-sweat. It works more efficiently by elevating touch-points for increased airflow, faster moisture dispersal, and reduced wet-cling. It's ideal for hot weather riding.

**ECOloft**

The first post-consumer recycled product that also incorporates bio-based materials for innovative, breakthrough insulation.

PROTECTED BY  
**D3O®**

D3O offers the thinnest and most advanced protection against impact. It's flexible to move with your body until impact, when it firms up to disperse the energy of the blow, making it perfect for riders who want to push their limits.

**PRIMALOFT®**

PrimaLoft® Gold with cross-core technology. Thanks to ultra-light Aerogel particles, this insulation allows us to get amazing thermal performance with the least amount of material and lowest bulk.

# Men's Fit Guide

**FORM**  
Snug to body.  
Engages stretch.

**STANDARD**  
Partially conforms  
to body.

**RELAXED**  
Drapes loosely  
on body.
